

### KEOPS Solutions Series

CUBE Technologies has developed KEOPS Solutions Series for optimizing power supply distribution.

It helps to fulfill venue managers' requirements in terms of:

Operations tracking	Better productivity during installation
Real-time supervision of ongoing events	Extra sales and new sales development
Events history	Energy management optimization
Improvement of quality of services for clients	Investments sustainability
Enhancement of exhibitors' safety on their stand	Innovative image for the venue

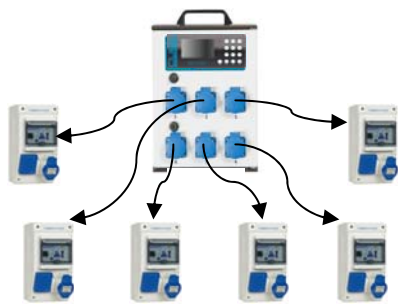

KEOPS Solutions can easily adapt to the different levels of the electrical installation:

-  Upstream power supply to manage the whole infrastructure > **KEOPS INFRA**
-  Intermediate distribution to control your standard terminals > **KEOPS DISTRIBUTION**
-  On stands with a smart power supply > **KEOPS TERMINALS**

#### KEOPS INFRA

### KEOPS MANAGER Software

KEOPS MANAGER Software is common to the three solutions.

It is a professional software, dedicated to power supply implementation and follow-up.

It has been developed in close collaboration with electricians working on different venues.

KEOPS MANAGER Software simplifies and optimizes relationships between technicians

and exhibitors, before, during and after the event.

It includes many other tools, matching with different applications.
